

# SHARE-Gateway User Conference, Berlin, Nov. 6-8, 2024

## Program

GATEWAY TO  
GLOBAL  
AGING  
DATA

### Objective

The conference aims to increase visibility and foster the use of SHARE (Survey of Health, Ageing and Retirement in Europe) data and the broader international network of health and retirement studies supported by the Gateway to Global Aging Data. It will promote discussion between users on research evaluating a range of topics covered in the international network, especially cross-country work on health, ageing, and retirement. Day 1 features workshop sessions on the Harmonized Cognitive Assessment Protocol (HCAP) and the Gateway's cross-study harmonized datasets, and the following two days comprise 6 parallel sessions presenting work by SHARE-Gateway users selected by the scientific committee.

### Day 1 (Wednesday, November 6)
