

THE LONGITUDINAL AGING STUDY IN INDIA, DIAGNOSTIC ASSESSMENT OF DEMENTIA (LASI-DAD)

SENSITIVE DATA ACCESS USE AGREEMENT

This Sensitive Data Access Use Agreement ("Agreement") permits the Individual User named below to obtain access to the datasets documented in Attachment A: Sensitive Data Order Form. A separate agreement must be completed for each User. In consideration of the LASI-DAD providing access to an LASI-DAD Sensitive Dataset to the User, the Receiving Entity, on behalf of the User, agrees:

- 1. To make no attempt to identify the persons in this or LASI dataset.
2. That if the identity of any person or establishment in this file is inadvertently discovered, then (a) no use will be made of this knowledge, (b) the Director of LASI-DAD will be advised of this incident immediately, (c) the information that would identify any individual or establishment will be safeguarded or destroyed, as requested by LASI-DAD, and (d) no one else will be informed of the discovered identity.
3. To employ the following guidelines when producing tabulations for distribution:
a. Magnitude Data: Ensure that no cells/strata with n < 50 are produced.
b. Frequency Data: Apply a marginal threshold of n >= 50 and cell threshold of n >= 50 to all tabulations.
c. Protecting against complementary disclosure: Additional cells may be suppressed, i.e., complementary disclosure, to make sure the primary suppressions cannot be derived by subtraction from published marginal totals.
4. To publish only aggregate statistical summaries of the data and analyses (frequency tabulations, magnitude tabulations, means, variances, regression coefficients, and correlation coefficients), subject to the provisions above.
5. To cite LASI-DAD as the data source in any publications or research based upon these data, and to provide a copy of any publications to the LASI-DAD. The following citation should be included in any research reports, papers, or publications based on these data:
In text: "The Longitudinal Aging Study in India, Diagnostic Assessment of Dementia data is sponsored by the National Institute on Aging (grant number R01AG051125, RF1AG055273, U01AG065958) and is conducted by the University of Southern California." In references: "The Longitudinal Aging Study in India, Diagnostic Assessment of Dementia Study. Produced and distributed by the University of Southern California with funding from the National Institute on Aging (grant number R01AG051125, RF1AG055273, U01AG065958), Los Angeles, CA."
6. To store and use this data set (and any data sets derived from it) in a secure computing environment.
7. Not to distribute the data to anyone else for any purpose. Not to use for commercial purposes.
