

THE LONGITUDINAL AGING STUDY IN INDIA (LASI) DATA ACCESS USE AGREEMENT

This Data Access Use Agreement ("Agreement") permits the Individual User named below to obtain access to the datasets documented in *Attachment A: Data Order Form*. A separate agreement must be completed for each User. In consideration of the LASI providing access to an LASI Dataset to the User, the Receiving Entity, on behalf of the User, agrees:

1. To make no attempt to identify the persons in LASI dataset.
2. That if the identity of any person or establishment in this file is inadvertently discovered, then (a) no use will be made of this knowledge, (b) the LASI data committee will be advised of this incident immediately, (c) the information that would identify any individual or establishment will be safeguarded or destroyed, as requested by LASI, and (d) no one else will be informed of the discovered identity.
3. To employ the following guidelines when producing tabulations for distribution:
 - a. Magnitude Data: Ensure that no cells/strata with $n < 50$ are produced.
 - b. Frequency Data: Apply a marginal threshold of $n \geq 50$ and cell threshold of $n \geq 50$ to all tabulations.
 - c. Protecting against complementary disclosure: Additional cells may be suppressed, i.e., complementary disclosure, to make sure the primary suppressions cannot be derived by subtraction from published marginal totals.
4. To publish only aggregate statistical summaries of the data and analyses (frequency tabulations, magnitude tabulations, means, variances, regression coefficients, and correlation coefficients), subject to the provisions above.
5. To cite LASI as the data source in any publications or research based upon these data, and to provide a copy of any publications to the LASI. The following citation should be included in any research reports, papers, or publications based on these data:
 In text: "The Longitudinal Aging Study in India Project is funded by the Ministry of Health and Family Welfare, Government of India, the National Institute on Aging (R01 AG042778, R01 AG030153), and United Nations Population Fund, India." In references: "The Longitudinal Aging Study in India. Produced by the International Institute for Population Sciences, Harvard T.H. Chan School of Public Health, and University of Southern California and distributed by the University of Southern California with funding from the Ministry of Health and Family Welfare, Government of India, the National Institute on Aging (R01 AG042778, R01 AG030153), and United Nations Population Fund, India."
6. To store and use this data set (and any data sets derived from it) in a secure computing environment.
7. Not to distribute the data to anyone else for any purpose. Not to use for commercial purposes.
